

Flagged Words & Phrases

FB is weeding out the people that put things up on their timelines that are basically spam. How do you get around that?? Don't be spammy!! Speak the language of humans. Golden Rule

If you wouldn't say it in person, while directly standing in front of them physically, then don't type it!

Below is a list of current flagged words/phrases. These are flagged when using them on your timeline, not when creating an actual paid for ad. Two different sets of rules there. If flagged, your post won't get shown as much and your algorithm will temporarily go down.
